ABOUT ME

B.Tech Information Technology student at PICT Pune (CGPA: 9.69) with strong interest in software development, problem solving, AI systems, and scalable applications. Experienced in building projects across machine learning, web development, and system-level applications, with active involvement in hackathons, open-source, leadership, and technical communities. Passionate about solving real-world problems using impactful technology.

EDUCATION

2024 – 2028	Bachelor of Technology Information Technology
Pune Institute of Computer Technology	CGPA: 9.69 Minor in Finance
2024	Higher Secondary Certificate (HSC)
Jadhavar Jr. College, Pune	Score: 86%
2022	Secondary School Certificate (SSC)
Vision English Medium School, Pune	Score: 95.6%

TECHNICAL SKILLS

- Languages:** C++, C, Python, Java
- Core CS:** DSA, OOP, DBMS, CN
- Web Development:** HTML, CSS, JavaScript, React.js, Node.js, Express.js
- AI/ML:** Supervised Machine Learning , NLP, GenAI
- Tools:** Git, GitHub, Figma, Postman (API Testing), VS Code

PROJECTS

AI Loan Sales Chatbot (EY Techathon – Round 2 Shortlisted) | | Python, LLMs

- Built a conversational AI chatbot to simulate end-to-end personal loan sales workflows.
- Designed a multi-agent architecture for verification, eligibility checks, and approval automation.
- Automated customer interaction and generated structured loan approval outputs.

Carbon Emission Tracker & Analyzer | ML (Isolation Forest), Blockchain

- Developed a carbon footprint tracking and analysis system for enterprise/government use cases.
- Used Isolation Forest for anomaly detection and blockchain for secure emission record integrity.
- Focused on improving transparency and anomaly identification in carbon data.

Digit Classification (MNIST) | CNN

- Built a handwritten digit classification model trained on the MNIST dataset.
- Integrated an HTML canvas interface for real-time digit prediction through browser interaction.

Language Learning App (TechRush Winner) | HTML, CSS, JAVASCRIPT

- Developed a gamified language learning platform with progress tracking and interactive UI.
- Secured 1st position at IEEE TechRush Hackathon.

EXPERIENCE

Google ELP Pune Region — Co-Lead | 2026 – Present

Working with the core team to manage regional technical initiatives and student engagement. Supporting cross-college collaborations, technical events, and community growth initiatives.

Google ELP PICT — Campus Lead | 2026

Setting up a new tech club in college.

AWS Research Intern | 2026

Designed a cost-aware request routing system for serverless architectures. Developed an ML-based approach to select cost-optimal servers under varying workloads. Analyzed inefficiencies in existing routing systems to improve resource utilization.

AWS Student Community Day — Event Host & Anchor | 2026

Anchored and hosted a large-scale technical community event. Coordinated speaker transitions, audience engagement, and event flow management.

Java & ML SIG Instructor | 2026

Conducted sessions on Java fundamentals and Machine Learning basics for first-year students. Simplified technical concepts through interactive peer-learning sessions.

Open Source Contributor — GirlScript Summer of Code (GSSoC) & Hacktoberfest | 2025

Contributed to open-source projects using Git/GitHub workflows. Collaborated with maintainers through pull requests, issue resolution, and documentation improvements. Earned contribution level badges.

ACHIEVEMENTS

Winner — IEEE TechRush Hackathon (2025)
EY Techathon 6.0 — Round 2 Shortlisted
PCCOE Indradhanu International Grand Challenge — Round 2 Shortlisted
Google ELP Pune Region — Co-Lead Pune region and PICT campus lead
Open Source Contributor — GSSoC & Hacktoberfest Level Badges
